

# Open spaces in a residential development in Caldaro/Kaltern

**PlanSinn was commissioned with the planning of the open spaces for a subsidised housing complex in Caldaro/Kaltern / Trentino-Alto Adige/ South Tyrol.**

Based on the results of the preceding competition for the preparation of the implementation plan for the municipal housing project, PlanSinn and feld72 architects jointly developed the residential complex and its open spaces in a dialogue with all the future residents. The central square executed in cast-in-place concrete on top of the underground car park serves as a meeting place and central open space on the steeply sloping terrain. Green play slopes create a link between the individual buildings.
